

POM

**THREE WAYS TO REDUCE
WORKPLACE VIOLENCE**

Learn how with POM

WHAT IS POM?

POM is the one-touch safety button that can instantly connect you with emergency help.

Button Patterns

Triple Tap for Emergency Help

Tap the POM three times to connect with the 24/7 dispatcher with a two-way call through the POM

Press and Hold

Press and hold the POM to activate one of the many One-Hold features like Auto Text, Auto Call and Fake Call.

3 Ways To Stay Safe In The Field

DISPATCH

DEESCALATE

DETER

Find out how...

1

DISPATCH WITH POM

In the event of an emergency the POM system can quickly and efficiently get help to the user's location. Unlike 911 or other hotlines, the POM transmits vital location and profile information along with a two-way call that is established between the POM device and the dispatcher.

+ Triple Tap

Simply tap the POM three times to initiate an emergency alert

+ GPS Location

The POM will transmit the user's GPS coordinates to the dispatcher so that responders will have an exact location down to one foot of accuracy.

+ Two Way Call

Talk to the dispatcher via a two-way call directly through the POM

+ Profile Information

The POM transmits vital profile information that can be used to identify the person in need and alert responders to any important medical information like allergies or medical conditions.

+ Faster than an App or 911

The POM can call for help faster and easier than using a standalone app or trying to dial 911. No need to unlock your phone or dial any numbers, simply tap three times for emergency help.

2

DEESCALATE WITH POM

POM can help before a situation becomes a serious danger or emergency. Use the POM's many customizable features to get the right help for your situation.

Multiple Ways to Deescalate Any Bad Situation:

+ Fake Phone Call:

Send a fake call to your phone for an instant excuse to remove yourself from an awkward or uncomfortable situation.

+ Auto Text/Auto Call:

Send a prewritten message or call for help with a simple press and hold to auto call for backup

3

DETER WITH POM

Simply carrying the POM on your key-chain or other visible location acts as a deterrent against unwanted attention or attack. Assaults are much less likely to occur while carrying a panic button that can summon help instantly.

PHYSICAL DETERRENT:

- + Large enough to be visible & recognizable as a panic and communication device
- + Easily Attaches to clothing, key-chain, or bag
- + Sleek and durable non-intrusive design

PSYCHOLOGICAL DETERRENT:

- + People behave more respectfully knowing you have easy access to backup
- + Instantly connect to an outside source for help or guidance
- + Work with more calm knowing you have access to help

ADDITIONAL POM FEATURES

Keyfinder

Locate your keys or bag with the POM Safe app

Walking Escort

Get a virtual walking escort to arrive at your destination safely

Compact and discreet design

Easily attaches to key chain or clothes

Get discreet help with Silent Alarm

Quickly get out of an awkward or bad situation with Fake Phone Call

...and 72% of users report feeling safer carrying POM.

TESTIMONIALS

"It just makes you feel safe. You just hit a button and someone comes to help."

Chrissy
Travel Nurse

I consider this a better investment in our campus security infrastructure than throwing money at our blue light emergency phones."

Michael Reiner
Director of Public Safety, Creighton University

"With the POM I feel more comfortable to go into neighborhoods I don't know. If it gets uncomfortable the Fake Phone Call helps me to get out discreetly."

Lauren
Travel Physical Therapist

"...Staff may encounter unstable patients or family members, potentially dangerous pets, or observe signs of abuse or domestic violence in the home... With the POM security device, we're taking our staff safety program to the next level by embracing rapid response technology that will connect them to the critical aid they need when they need it..."

Tim Leddy
CEO of VNS Westchester

POM SUCCESS STORIES

Assault & Attempted Murder

One harrowing example of POM's effectiveness came from a woman who had purchased the device for her own personal use. Just one day after setting up her POM, on Aug. 25, 2017, she was physically attacked by a man in her home. She reached into her pocket and activated her POM device, which called the 911 dispatcher. The dispatcher's voice came through the POM speaker and startled the attacker, which caused him to flee. The attacker was later arrested and put in jail. In her own words, "the POM helped save my life." She admitted there was no way she could have gotten to her phone to dial 911.

Medical Emergency

The POM was used by a Creighton student experiencing a non-life-threatening medical emergency off campus. The student activated the POM and was connected with 911 and Public Safety. Public Safety officers responded directly to her location and transported her to the hospital.

OUR MISSION

POM is dedicated to solving personal safety problems and providing peace of mind for all users. Our company was founded on the belief that we can do something greater to protect the people that we love. The POM device is our first step in fulfilling that vision.
